

Distributing the Future Daily!

GENZEON PROFESSIONAL SERVICES

Genzeon offers enterprise, program / project level support and mentorship on emerging technologies teaming with you onsite or through project augmentation. We can deliver cost-effective POC assessments for new approaches and technology as your team is focused on generating business value. We provide full stack development and support and are especially focused on integration capabilities and cloud enablement, helping clients mature their API strategy and Service Orientation for internal and external customers. To this end, Genzeon has partnered with MuleSoft, TIBCO and Microsoft to provide a full range of critical capabilities.

The transition to the cloud is well under way, but what is the best fit for you and your customers? As cloud agnostic practitioners, we can work with your preferred vendor and can quickly leverage our extensive experience with Azure and AWS.

ABOUT GENZEON

Genzeon builds customized Applications, Performance Engineering, Healthcare Information Technology (HIT), Partnered and Strategic Resourcing solutions for clients in a variety of industries in the commercial and public sector throughout the United States and across the globe. Our in-house functional and technical experts help solve our clients' most critical business & human capital challenges with flexible, scalable, next-generation technologies and services that enhance and optimize their systems to meet their organizational needs now and into the future. Partnerships with Microsoft, Tibco, MuleSoft and MongoDB enhance our ability to provide exceptional results in all of our service offerings.

CLOUD & MIDDLEWARE FOCUS

- Guide clients to better manage Products, Solutions, Services, Software and Processes
- Provide clients ways to link disparate internal and external systems.
- We are adept at cross platform integration of data and applications and will work with you and your partners to provide convenient and consistent access to all your mission critical data - weather Transactional Data or Big Data for Business Intelligence or Analytics.
- Capable of Introducing new technology through POC or pilot project serving as your advocate and based on your business requirements.
- Help clients document and understand current assets to rationalize risk mitigation and achieve improved TCO.
- Partners with you to capture your near-term and long-term business need to rationalize a strategy, tune the systems or if needed, to implement transformational technologies.
